

# CHEMISTRY EXTRA CREDIT OPPORTUNITIES

---

Each extra credit exercise you complete is worth one point added directly to your final averaged grade. With this extra credit you can get a TOTAL of four (4) extra credit point in any one quarter. Submitting more than four will NOT get you more points.

The current list of **Extra Credit** opportunities are listed on the website under the *Extra Credit* tab. These will change so it behooves you to check that page each quarter.

Any review or overview or question must be submitted by the end of the school day on the last day of the quarter to be considered for that quarter, but you may submit it anytime during the quarter. It is preferred that you do not wait until the last moment to submit your work. You may hand the work in or you may email it to me at **reports16(at)thinkchemistry(dot)com** or **reports16(at)thinkchemistry(dot)org**, or my Nerinx email address.

**There are all kinds of opportunities available in the Saint Louis area.**

**Some questions can be used several times (elements, famous women scientists, famous scientists, extra written reports, etc.). You may just not REPEAT a prior extra credit submission.**

**There will be topic-related questions available each quarter for you to answer.**

Feel free, at any time, to come up with your own ideas. Please get approval from me first.

I periodically give other extra credit opportunities to you to try (like SHOUT Week, etc.) and these others are not part of this opportunity. Often I list these on my web page or email them to everyone or mention them in each class.
